

# controls & lifts

A Member of the White Conveyors Family

material handling solutions for the linen supply industry  
soiled sorting-soiled and clean storage- clean distribution

**MAST LIFT**

This twin column, 3-position lift with its welded tubular frame is rated to 650 pound capacity. Safety features include plc monitoring of trolley movement, fall protection and floor guards.

**BEAM LIFT**

Both electric and pneumatic lifts are available from 1,000 pound to 3,000 pound capacity. Safety features include plc monitoring of trolley movement and floor guards.

**COMPUTERIZED CONTROL SYSTEM**

Flexible designs include sorting by weight and/or count, and rail control with washer/ tunnel scheduling features.

**AIR CONTROL PANEL**

Pneumatic air control panels come standard with our non-computerized systems. Optional electro-pneumatic controls are also available.

our custom designed systems can be either floor or ceiling supported and are created to optimize efficiency and space utilization

**SOILED SORTING OPTIONS:**

You decide..... we offer 1) manual sort, 2) sort on belt, 3) sort on slings "in and out" and 4) sort on slings; sorting solutions for rental or NOG customer lines

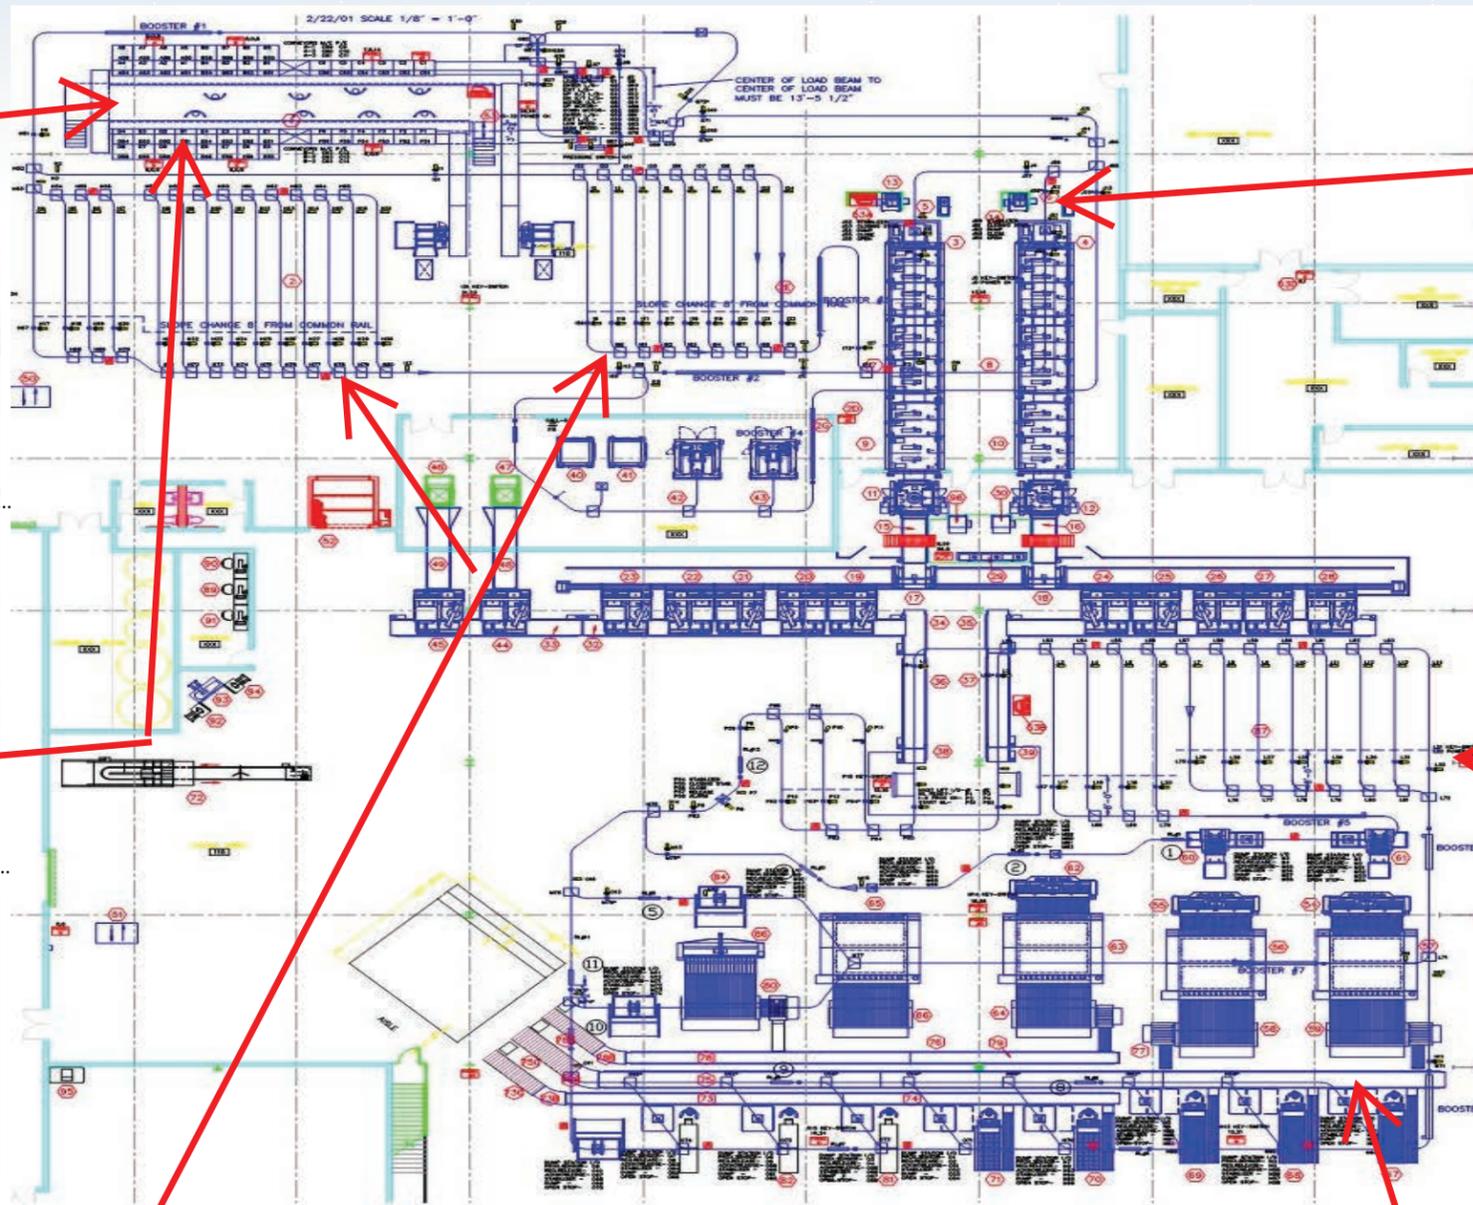

**SORT ON BELT SORTING SOLUTION:**

Sort employees sort into dual sort bins; soiled linen is collected in slings; when target weight is achieved the sling discharges on clear belt to load soiled sling to automatically load tunnel washer.

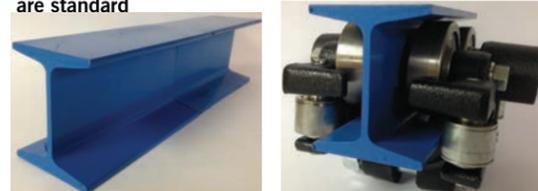

**SOILED LINEN STORAGE RAILS:**

Soiled rails can store slings, in pairs, by customer and linen classification. Storage rails can be ceiling mounted or floor support mounted; rails accommodate either soft top or ring slings with optional auto sling open feature.

3" steel I-beam for strength and durability, painted for corrosion resistance.

- 600 pound capacity, 4-wheel trolley and 6" load hooks are standard

**TUNNEL WASHER LOADING:**

Automatic tunnel washer "call off" sling loading for multiple tunnel washers allows optimized linen mix and production control.

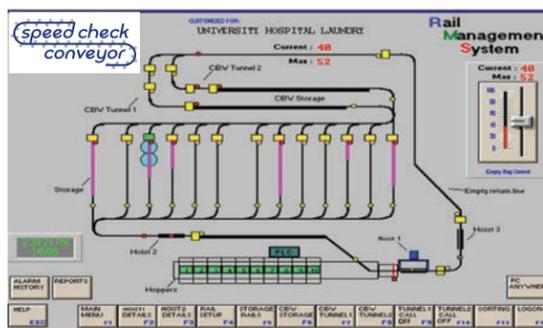

**CLEAN LINEN STORAGE RAILS:**

Automatically store and distribute "full dry" and "iron dry" linens to appropriate work area.

**CLEAN LINEN TAKE AWAY CONVEYORS:**

Transfer linens from folders and dry fold areas to consolidate customer cart make up.
